Start your wireless network
with Linksys

LINKSYS®
A Division of Cisco Systems, Inc.

Start your wireless network with Linksys

Share your high-speed Internet connection, files, printing, and more—all without stringing wires! The Linksys Wireless-G broadband router is an all-in-one Internet-sharing Router, 4-port Switch, and 54Mbps Wireless-G Access Point. Almost 5 times faster than 802.11b, it can also interoperate with any 802.11b device (at 11Mbps).

Add a Linksys Wireless-G USB Network Adapter to your desktop and connect it to a wireless network at up to 54Mbps, without opening the case. The adapter plugs easily into a USB 2.0 port and is also compatible with wireless-B networks (at 11Mbps). It's the easy way to connect your desktop to a high-speed wireless network!

Rev up your new PC with a
memory upgrade

With the combination of your new computer and a power-packing memory upgrade, you can easily work with multiple programs at the same time, and handle graphics-heavy software and games. From the Internet surfer to the gamer, more memory means better performance. Your software responds more quickly, Web pages download faster, and you can run several programs at once without annoying time lags.

Visit the memory store on hpshopping at www.hp.com/go/hpmemory today, and use the online memory configurator to customize your computer to fit your needs perfectly. You'll find special deals on high-quality DRAM and DDR memory upgrades. Our HP memory has been specifically tested and qualified for your Compaq Presario PC.
